

Downloading and Installing:

1. Open the World Wide Notary website download page at <http://www.wwnotary.com/Download.html>
2. Click the download link for DigaSign Update Service setup
3. Download and install the service following the install wizard
4. Update the settings
5. Start the service

Updating the Settings:

1. Open the DSClientUpdateService.exe.config in Notepad. (This file will be in the directory you installed from above)
2. Update the **UpdateSection**
 - a. ApplicationDirectory
 - i. This is the directory the DigaSign application is installed. This is normally *C:\Program Files (x86)\World Wide Notary\DigaSign*.
 - b. UpdateTime
 - i. This is the time you want the service to check for updates. It is based on a 24 hour clock so 15:45 is 3:45PM.
 - c. Server
 - i. This is the server to check for the update. This setting should be left at *www.wwnotary.com*.
 - d. UserName
 - i. This is the user name of an active DigaSign user.
 - e. Password
 - i. This is the password of an active DigaSign user.
3. Update the **Products**
 - a. The base application **DigaSign** is already in the product list (Do not remove this)
 - b. Add any additional products (Please contact DigaSign Support for your list of products)
4. Update the **Notifications**
 - a. Change the *EmailAddresses* for the Exception Notifications
 - b. Change the *EmailAddresses* for the Updated Notifications
5. Save the changes

Starting the service:

1. Open services.msc.
2. Locate the **DigaSign Client Update Service**
3. Right Click and select Start
