

World Wide Notary Announces Release of DigaSign, Internet Notary Service

DigaSign, a patent-pending Internet service, enables documents to be notarized in a secure environment in minutes instead of days at a fraction of the cost of traditional delivery.

Vernon, TX—(10/11/2004) **WWNotary, L.L.C.** (Privately Held), the leading provider of electronic notary services, today announced the release of **DigaSign**. **DigaSign's** flexible and universal interface accepts documents needing verification and notarization from any Window's based application. Industries such as government, mortgage, real estate, legal, insurance, banking, auto, oil and gas as well as many others will save time and money with this service.

DigaSign not only utilizes digital certificates but also biometric signatures, which allow the signatures and seals to be displayed to emulate hand written documents. Once the customer or client have reviewed and accepted the "Document of Record", they can sign once and their signature or initials are placed in the appropriate document locations requiring their acknowledgement. With **DigaSign**, there are no missing signatures or initials, thereby eliminating costly errors and the redundancy of needing to resubmit documents. **DigaSign** communicates using any Internet connection making global business transactions convenient. Documents can be created and signed from multiple locations by multiple signers in minutes instead of days.

DigaSign utilizes the latest in technology for encryption and security to ensure that documents remain confidential and can not be altered once posted. **DigaSign's** secure, patent pending technology exceeds Federal mandates (such as E-SIGN and UETA) and State regulations regarding Internet security, encryption, and use of electronic and digital signatures.

DigaSign will revolutionize the way notary services are provided.

About World Wide Notary:

WWNotary, L.L.C., the leading provider of electronic notary services, is a privately held corporation. Pioneering electronic signatures, as early as 1996, WWNotary's management team has years of experience in the Internet technology industry working with stringent Federal mandates, such as HIPAA, E-SIGN and UETA, regarding security and the use of electronic and digital signatures.
