RS Associates to market World Wide Notary's enotarization solution to Retail Shipping Centers Nationwide

Vernon, TX—(07/17/2007) **World Wide Notary** today announced a strategic marketing alliance with Dallas based Retail Shipping Partners, Inc. dba RS Associates. Helping retail shipping centers across America work better, faster and more cost-effectively is the mission of RS Associates. In line with that mission, RS Associations is bringing World Wide Notary's enotarization solution, DigaSign, to retail shipping centers to provide services that have never been available in the market place— **immediate processing of documents requiring esignatures and enotarization making them available for immediate edelivery.**

"Notary Public services have been a staple service of neighborhood shipping centers and private postal stores since the industry began some 30 years ago," stated RS Associates President Brandon Gale. "We believe this alliance with World Wide Notary and DigiSign will complement our long term strategic plan of establishing a nationwide network of Document Signing Centers through our RS Notary Network program."

The RS Notary Network is an affiliation of independently-owned retail shipping and postal stores who offer Notary Public services to their community. Located in almost every city in the country, these storefront merchants provide a unique combination of access and convenience for individuals seeking the services of a Notary Public: convenient neighborhood locations; extended business hours; Monday – Saturday business days; and personal attention. In addition, most RS Notary Network affiliates offer one or more of the following products or support services at their location: copy services; passport expediting; postal / shipping services; bill payment services; fax services; money transfer services; passport photos and private mail box rentals.

DigaSign provides a secure network to document signing centers to service the document processing needs of professionals and the general public. This network will enable centers or businesses to post contractual documents on DigaSign's secure servers. The creator of the documents forwards a package key and password to one or multiple signers who can walk into any retail shipping center and have their contracts signed and / or notarized in the personal presence of a DigaSign notary.

"This alliance provides the next evolutionary step to drive ecommerce across a national network of retail shipping centers to provide esignatures and enotarizations. DigaSign will enable thousands of consumers to esign, eséal and edeliver documents with the security, convenience and reliability these centers offer", said Bob Rice, CEO World Wide Notary.

"Integrating DigitSign's products and processes into our national network of brick-and-mortar retail locations is a win-win for everyone," stated Gale. "Document originators and recipients will enjoy a significant saving in time and transportation cost, not to mention the expedited delivery advantage."

DigaSign is an Internet application that allows any Windows-based document to be electronically signed, notarized and delivered within a secure environment. With security and notary integrity as its critical responsibility, World Wide Notary stringently validates all users' identities and monitors a notary's commission standing with the Secretary of State. If a notary's commission has expired or has been revoked, DigaSign will prevent that notary from conducting an electronic notarization.

DigaSign also uses the latest in technology for encryption and security to ensure that documents remains confidential and cannot be altered once completed. DigaSign's secure, patent pending technology exceeds federal mandates and state regulations regarding Internet security, encryption and use of electronic and digital signatures.

About World Wide Notary:

World Wide Notary, a privately held Texas Corporation, is a leading provider of electronic signature and electronic professional seal technology. World Wide Notary's technology can be utilized by any industry needing multiple signatures and/or professional seal approvals from multiple locations. Professional seals could be for example notaries, architects, surveyors, geologists and government officials. Pioneering electronic signatures, as early as 1996, World Wide Notary's management team has years of experience in the Internet technology industry working with stringent federal mandates, such as HIPAA, E-SIGN and state UETA regulations, regarding security and the use of electronic and digital signatures.
